

## V-CON Notes from May 13, 2005

### **New Models are here!!**

MFD2561HES: New Stainless Steel Handles

JFC2089HPY: Black glass French door

JC2295KES: Counter Depth

### **Front Fill/Express Fill dispenser**

Dispenses water and ice simultaneously

Amana mechanical switch

Maytag/J/A Electronic switch

### **Amana/J/A Beverage Chiller**

Cold air from freezer port

Directed into the chiller

Cold air contained in chiller compartment

### **Triple Cool (in Maytag)/ Tri-Sensor (in Jenn-Air)**

There are 3 sensors!!!

There is one in the freezer, one in the refrigerator, and outside of the unit to monitor the outside temperature.

The benefit is less temperature fluctuation which causes food to spoil.

The outside monitor let's the refrigerator know how hard it will have to work after the door is closed (ie if the outside air is really warm, the refrigerator will have to work a little harder to get to the desired temperature after the door is closed. If the outside air is relatively cool, the refrigerator knows it will not have to work as hard to get the temperature back down after the door has been opened and closed.

### **These Electronic Models have Adaptive Defrost**

The adaptive defrost will only defrost when it needs to

Other models will defrost on a timed basis

The Benefit: Saves Energy by not defrosting unless it needs to

Also monitors and remembers normal usage

Will not defrost during heavy usage times (for example: at 3 pm when the kids come home from school)

Maximizes food freshness through ideal timing of defrost cycles

### **Speed Ice**

Operated for 24 hours

Puts freezer into its coldest mode

The result is faster ice production

These refrigerators have a lot of new features (Door alarm, Sabbath mode, ect.) It would be very beneficial for you to look to the manuals to be familiar with all these new features during down time in your stores ☺

### **Q and A with Steve???**

**Q** Why don't the JA French doors with the glass fronts open all the way?

**A** The doors would break if they were to hit a cabinet since they are made of glass. It is a safety precaution.

**Q** Have there been any returns/problems on the new Direct Drive machine?

**A** not to my knowledge

**Q** Is the Drying Center available in bisque?

**A** yes☺

**Q** Do Gemini's come in dual Fuel

**A**- Jenn- Air's does; but not Maytag's.

**Q** When will we see the new stack unit?

**A** around September

**Q** Are there any upcoming rebates?

**A** not just yet!! But there are package rebates on the KC website for Amana and Maytag. Go to [www.kitchenconsultants.net](http://www.kitchenconsultants.net) to see those.
